

AI agents move fast. Work design must catch up.

The competitive advantage is not more agents.
It is better human ownership.

Dr Alfred Ang | Tertiary Infotech Academy Pte Ltd
27 August 2026 | Institute for Adult Learning

REDESIGN > REHEARSE > RELEASE

12,000+ agents. One lesson: ownership cannot be automated.

AgentSea shows frontline professionals building and managing agents while humans retain consequential decisions.

12,000+
AI agents created

by Singapore public healthcare professionals since the platform launched in late May 2026

The doctor remains responsible for the clinical decision.

The advantage comes from redesigning work—not merely deploying AI.

WEF projects creation and displacement at the same time. The transition must be deliberately designed.

GLOBAL JOB CHANGE BY 2030

22% of today's formal jobs are projected to be disrupted.

THE EMPLOYER RESPONSE

86% expect AI to transform their business

77% plan to upskill workers for AI

41% also expect workforce reductions from automation

THE OPPORTUNITY

Make agent management part of the job.

Keep a human accountable at every consequential gate.

At Tertiary, agents support website and software workflows—and we help clients apply the same pattern.

LIVE PRACTICE

THE VALUE

Agents increase throughput. Humans protect judgement and accountability.

AI deployment creates adoption debt when roles lag behind.

If identity, decision rights and accountability remain unresolved, resistance compounds.

WHAT WE HEAR

"The agent is wrong."

"This will not work here."

"I do not have time to learn it."

WHAT IS OFTEN UNDERNEATH

JOB

Will I still be needed?

IDENTITY

What happens to my expertise?

CONTROL

Can I stop a bad action?

BLAME

Am I liable for its mistakes?

Resistance is not a people problem. It is a role-design signal.

The solution is an explicit Human Owner role.

Move routine production to the agent and make human decision rights visible.

Turn resistance into a redesign conversation.

Use GROW to surface the fear, identify strengths and co-create a safe experiment.

COACHING TURNS RESISTANCE INTO DESIGN INPUT.

Make the hard conversation safe to practise.

The simulator builds coaching confidence across six realistic forms of resistance.

AI AGENT JOB REDESIGN COACH - LIVE SIMULATOR

Sarah
Marketing
FEAR / IDENTITY

David
Customer Service
ANGER / TRUST

Mei Ling
Data Analyst
ANXIETY / WITHDRAWAL

Arjun
Software Developer
SCEPTICISM / PRIDE

Aisha
Web Operations
CONTROL / ACCOUNTABILITY

Farah
HR Executive
ETHICS / PURPOSE

OR SCAN

A coaching conversation can reframe fear as ownership.

Sarah moves from threatened doer to AI-augmented marketing lead.

REALITY

"The agent writes the campaign copy and builds the decks. That is basically my whole job."

Fear of redundancy
Loss of identity
No consultation
Anxiety about blame

REDESIGNED ROLE

AI-Augmented Marketing Lead

DIRECTION	Goals, creative angle and brand voice
CHALLENGE	Audit assumptions, facts and market fit
APPROVAL	Final gate for external content
INSIGHT	Feed live client and market context back
LEARNING	Refine the human-agent workflow

AI lights the way. The human decides the path.

PILOT ONE ROLE FOR TWO WEEKS.

Small scope. Named owner. Safe stop rules. Measurable evidence.

1

MAP THE WORK

What should the agent do - and never do?

2

NAME THE OWNER

Who reviews, approves, escalates and stops?

3

COACH ONE PERSON

Use GROW and agree a safe two-week experiment.
