

WORK REDESIGN FOR

Managing AI Agents

From AI assistant to digital co-worker

Dr Alfred Ang | Tertiary Infotech Academy Pte Ltd
27 August 2026 | Institute for Adult Learning

SCOPE > CHALLENGE > DECIDE

Singapore just made agent management a frontline skill.

AgentSea shows that non-technical professionals are already building, deploying and managing agents.

12,000+
AI agents created

by Singapore public healthcare professionals since the platform launched in late May 2026

NO CODE REQUIRED

HUMAN REVIEW

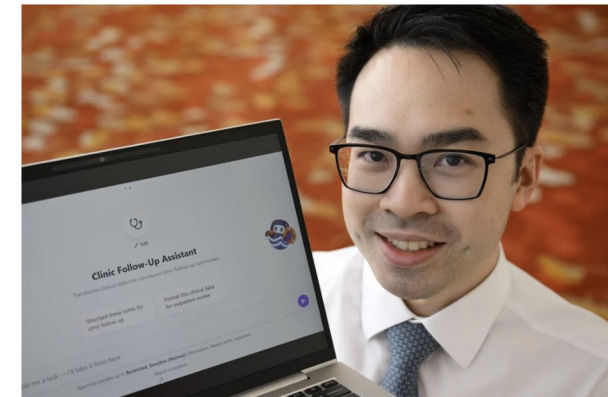

MOH: when AI can act, assurance must shift from outputs to actions.

THE STRAITS TIMES

New platform to create AI agents available to all public healthcare professionals

New platform to create AI agents available to all public healthcare professionals

The doctor remains responsible for the clinical decision.

Jobs are changing faster than job titles.

WEF projects both creation and displacement - making the transition a design challenge, not an automatic win.

GLOBAL JOB CHANGE BY 2030

22% of today's formal jobs are projected to be disrupted.

THE EMPLOYER RESPONSE

86% expect AI to transform their business

77% plan to upskill workers for AI

41% also expect workforce reductions from automation

PRACTITIONER THESIS

Managing AI becomes part of many jobs.

At Tertiary, agents already work inside the workflow.

We use agents to manage websites and software - and help clients do the same.

OUR PRACTICE

THE PRODUCTIVITY GAIN

Agents compress production. Humans move up to direction, judgement and accountability.

The real barrier is a threatened work identity.

Resistance often sounds technical, but underneath it are fear, fairness, control and accountability.

WHAT WE HEAR

"The agent is wrong."

"This will not work here."

"I do not have time to learn it."

WHAT IS OFTEN UNDERNEATH

JOB

Will I still be
needed?

IDENTITY

What happens to
my expertise?

CONTROL

Can I stop a bad
action?

BLAME

Am I liable for its
mistakes?

Technology deployment can be fast. Role transition is human.

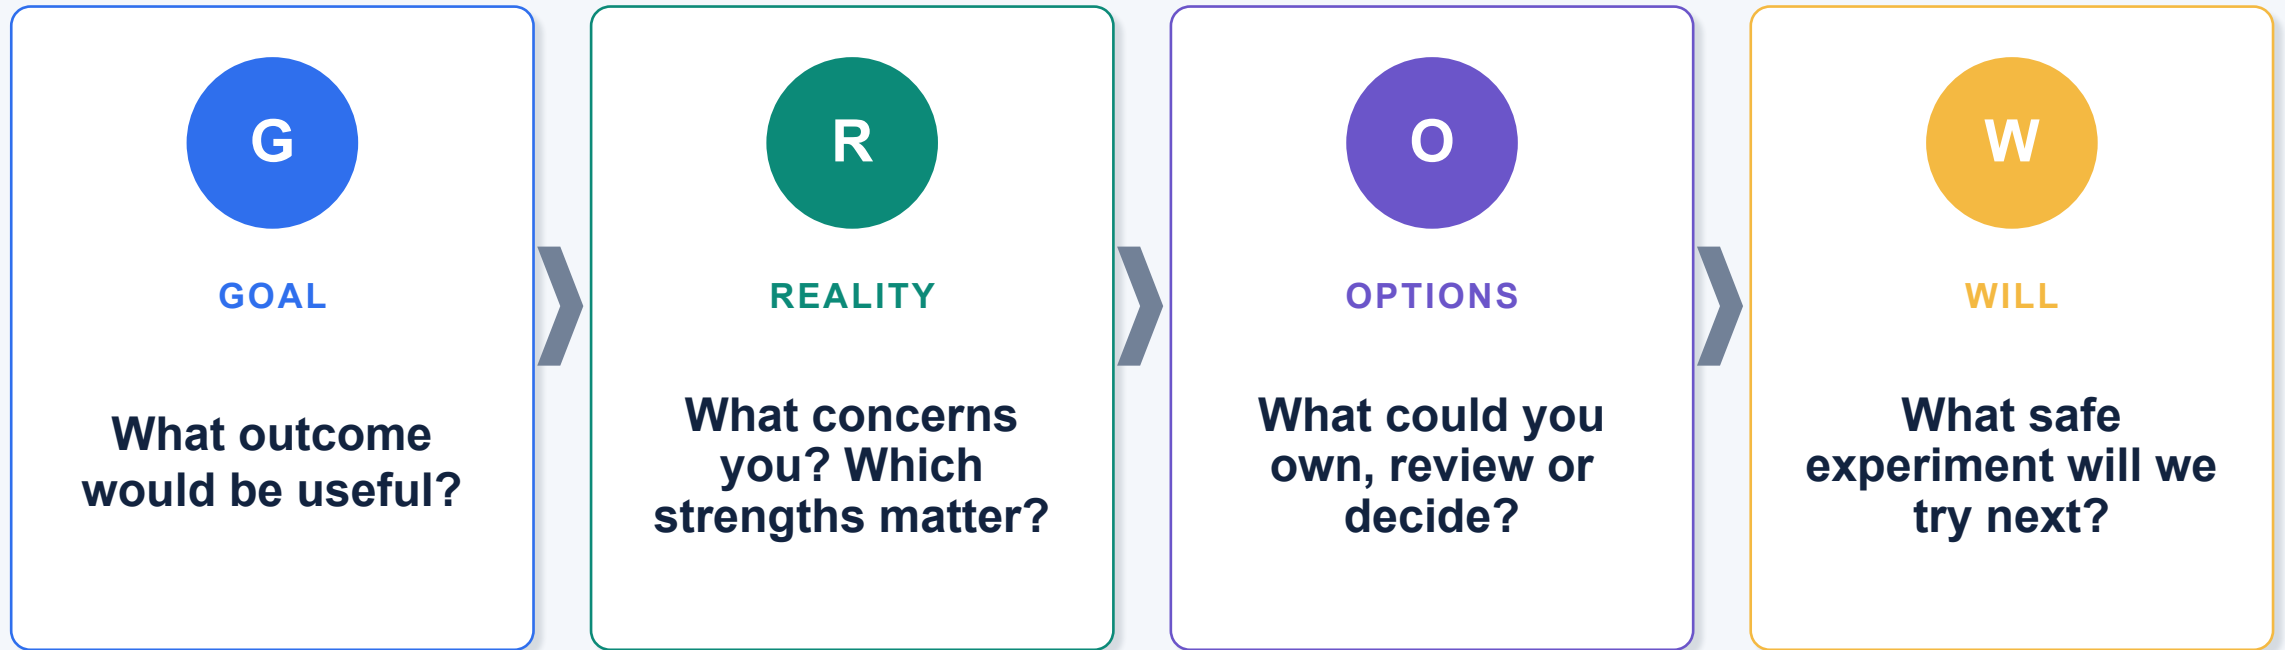

Shift the role: from doing every task to managing a system of work.

The agent takes production loops. The human gains decision rights, exception work and accountability.

Coach the transition with GROW.

Ask before telling. Co-create the new role so the employee owns the change.

EMPATHY IS NOT A SOFT EXTRA. IT IS THE ADOPTION MECHANISM.

Practise before the real conversation.

Six scenarios let mentors rehearse resistance, redesign a role and receive GROW-based feedback.

AI AGENT JOB REDESIGN COACH - LIVE SIMULATOR

Sarah
Marketing
FEAR + IDENTITY

David
Customer Service
ANGER + BETRAYAL

Mei Ling
Data Analyst
ANXIETY + WITHDRAWAL

Arjun
Software Developer
SCEPTICISM + PRIDE

Aisha
Web Operations
CONTROL + ACCOUNTABILITY

Farah
HR Executive
ETHICS + PURPOSE

TRY IT

No API key needed
in demo mode

[alfredang.github.io/
AICoaching](https://alfredang.github.io/AICoaching)

Sarah did not need reassurance. She needed a new role.

The coaching conversation moved from fear of redundancy to supported human ownership.

REALITY

"The agent writes the campaign copy and builds the decks. That is basically my whole job."

Fear of redundancy
Loss of identity
No consultation
Anxiety about blame

REDESIGNED ROLE

AI-Augmented Marketing Lead

DIRECTION	Goals, creative angle and brand voice
CHALLENGE	Audit assumptions, facts and market fit
APPROVAL	Final gate for external content
INSIGHT	Feed live client and market context back
LEARNING	Refine the human-agent workflow

AI lights the way. The human decides the path.

DO NOT DEPLOY AGENTS INTO YESTERDAY'S JOBS.

Redesign the work. Name the human owner. Coach the transition.

1

MAP THE WORK

What should the agent do - and never do?

2

NAME THE OWNER

Who reviews, approves, escalates and stops?

3

COACH ONE PERSON

Use GROW and agree a safe two-week experiment.

PRACTISE NOW
